```
library(ggplot2)
library(dplyr)
```

```
##
## Attaching package: 'dplyr'

## The following objects are masked from 'package:stats':
##
##   filter, lag

## The following objects are masked from 'package:base':
##
##   intersect, setdiff, setequal, union
```

```
library(ggplot2)
library(dplyr)
```

```
#head(diamonds)
smaller <- diamonds %>%
  filter(carat <= 2)
```

We have data about 53940 diamonds. Only 1889 are larger than 2 carats. The distribution of the remainder is shown below:
